

Marlabs Application Development Maintenance (ADM) Practice

Deliver application services that are aligned with your business needs.

Do you have unique requirements that cannot be met by a standard software product?

Marlabs will leverage our proven offshore-on-site business model to build applications that enhance your competitive advantage.

Our ADM Services at a glance

You can choose a single service or a combination of services – that can be adapted, as needed.

Technology Due Diligence

Marlabs will identify the right technology for your initiative, enabling you to make the best decisions.

New application development

By developing custom software applications, we will help you to differentiate yourself in the market place.

Product engineering

Leverage our product engineering expertise to realize your new product vision.

“Software bugs, or errors, are so prevalent and so detrimental that they cost the U.S. economy an estimated \$59.5 billion annually, or about 0.6 percent of the gross domestic product.”

NIST News Release

"The Marlabs project team was extremely competent and had a strong understanding of our business as well as technologies which included designing a complete EDI package to transmit data to and from the Bureau of Workers Compensation, Ohio. I would strongly recommend their software development services or any other services as our experiences have been excellent."

*Anthony Kafiti, IT Manager,
1-888-Ohiocomp*
