

Marlabs Independent Verification and Validation Practice

Maximize predictability of project cost, quality and time with our independent testing services.

Would you like to accelerate time-to-market while further improving quality through third party testing and validation?

Independent Verification and Validation (IV&V) has been shown to achieve Return on Investment in excess of 100%. IV&V has two primary objectives:

- Discovery of defects in a system.
- Assessment of usability in an operational situation.

Our IV&V Services at a glance

Our IV&V Services will be tailored to meet your needs. You can choose a single service or a combination of services – that can be adapted, as needed.

Functional Testing Services

Is your system meeting your needs? Our Functional Testing services assure requirements satisfaction through testing under various combinations.

Regression Testing Services

By speedily uncovering regression bugs, we ensure that the altered system continues to work as expected.

“Software bugs, or errors, are so prevalent and so detrimental that they cost the U.S. economy an estimated \$59.5 billion annually, or about 0.6 percent of the gross domestic product.”

NIST News Release

"Marlabs provided us with consulting, test and verification services for the Frontier Project where we developed the Voice Activated Assistant (VAA) telephony application. I am quite pleased with the technical expertise and commitment of the team. I am also impressed with their responsiveness and the flexibility to accommodate change. I would recommend Marlabs Inc. for similar work."

*Dennis White,
Manager, Ericsson*

User Acceptance Testing Services

Marlabs helps you obtain user feedback on the application in a simulated production environment.

Performance Testing Services

With our performance testing services, you can meet specified transactional loads and user volumes.

Test Automation Services

We enable you to reduce testing cycle times by leveraging test automation tools.

A winning solution!

- Mitigate risk by discovering errors early in the process.
- Decrease time to market through our test automation services.
- Optimize your testing tool licenses with our expertise in open source tools.
- Ease maintenance processes by owning an enterprise test asset library.
- Utilize our test metrics for continuous improvement in testing processes.
- Increase project efficiency by adopting our robust test methodology.
- Reduce TCO by leveraging our offshore capabilities and global delivery model.
