

Results

- ✓ Sped up Infra provisioning
- ✓ Reduce Infra cost
- ✓ Increased agility in product development and deployment
- ✓ Faster to market with more features
- ✓ Better CX & CS

Industry: BFSI

Country: United States

Technology Environment

- Azure
- VSTS
- Puppet, Tidal, SharePoint
- Java, .Net
- SQL Server
- Azure Express Route
- ServiceNow Orchestrator

Cloud Onboarding for a NY Banking Firm

Client

One of the leading investment banks in USA.

Business Requirement

- Reduce maintenance cost of on-premise datacentre
- Reduce Infrastructure road blocks to help frequent software release
- Digitise the legacy infrastructure environment through required digital transformation

Scope of Services

Onboarding enterprise applications to Azure Public Cloud and build a hybrid environment using Azure Express Route with high-speed direct connection to Azure Data Centres.

Solution Highlights

- Marlabs started with its cloud assessment program
- Marlabs security assessment of Azure Cloud Platform convinced the client for on-boarding to Azure cloud
- Executed a well-planned design and build in operationalizing Azure Cloud by extending existing tools and governance framework to Azure Network
- The deployment model was hybrid with the implementation of high speed connectivity to Azure-Express Route
